

THE ULTIMATE CASH REGISTER EVOLUTION FOR TODAY'S DEMANDING RETAIL AND RESTAURANT BUSINESSES.

QMP2000 series takes the evolution of the cash register to the next level by incorporating the latest technology standards. The 32-bit technology guarantees you top of the line performance and power efficiency. In addition, the FLASH ROM serves to securely store your POS software data sets. As a result, you benefit from maximum uptime as well as consistent system stability. Especially noteworthy is the graphical LCD display, which shows receipt items with crystal clarity.

The QMP2000's other hardware features are equally impressive. Choose from a variety of keyboards and high speed printers to suit your business; integrate and communicate with all the POS devices of your choice via an array of the latest interfaces such as USB, LAN, and RS232; or expand your electronic journal with an SD card to keep track of extensive sales data that the QMP2000 provides.

Furthermore, the QMP2000 comes with the QMP POS software that allows you to fully customize virtually every cash register parameter you desire. Extensive software functions like table management, floating cashiers, multiple price levels, mix & match, and comprehensive reports with clerk time attendance, supply a comprehensive feature set for both retail and hospitality management.

QMP 2000

Need more data transparency for your business?
No problem. Try the following QMP add-ons:

Stock Control – track your inventory with QMP.

EJournal View – analyze your e-journal with this easy-to-use tool.
